

Quality Manual: Appendix A Quality & Business Policy

SAVI PRECISION ENGINEERING - SAVI is committed to achieve our customer satisfaction through continual of the quality system, deliver product manufactured in compliance with customer requirements on timely manner.

SAVI recognizes that the disciplines of quality, health, safety, work ethics and environmental management are an integral part of its improvement management function. The Organization views these as a primary responsibility of each employee and as the key to good business in adopting appropriate Quality standards.

The policy system is maintained and continually improved through the setting, monitoring and reviewing of our quality objectives, data analysis, internal auditing, disciplined problem solving, corrective and preventive actions, physical and human resource requirements, and management review. Changes in the governing standards and regulatory/contractual requirements are assessed and incorporated on an on-going basis.

The Organization Quality Policy is:

- **SAVI shall follow a concept of continuous improvement and make best use of our management resources in all Quality matters.**
- **Communicate quality objectives and performance against these objectives throughout the Organization and to interested parties.**
- **Establish quality standards through our training and work instructions that meet or exceed our customer's expectations.**
- **Train our staff in the needs and responsibilities of quality management system, work and business ethics.**
- **To operate in a manner that sustains registration to the International Quality Standard ISO 9001:2015/AS 9100 Rev D.**

SAVI PRECISION ENGINEERING is committed to being recognized as a world leader in providing high quality products meeting or exceeding our customers' needs both in a cost optimized and sustainable manner de-risking the supply chain to its customers by defining its key business objectives.

The Organization Business Policy Objectives are:

- **On acceptance via contract review, achieve 100% OTD – achieved by protecting the customer via supplier held stock.**
- **Internally limit any process scrap or concession rate to 15% of all internally processed material – achieved by continuous performance monitoring and process improvement.**
- **Deliver plant equipment and operator efficiency to a level of 0.70% OEE across all processes by developing highly trained and adaptive operators integrated with internal site support.**
